

FLAHERTY & CRUMRINE DYNAMIC PREFERRED AND INCOME FUND

To the Shareholders of Flaherty & Crumrine Dynamic Preferred and Income Fund (“DFP”):

The Fund turned in another strong quarter as preferred securities continued to benefit from a global search for yield, a benign economic backdrop, and favorable market technicals. Total return¹ on net asset value (“NAV”) was 4.6% for the fiscal quarter² and 12.7% for the first half of the fiscal year. Total return on market price of Fund shares over the same periods was 5.4% and 17.0%, respectively.

The table below shows Fund returns over various measurement periods, and they continue to be very strong. The table includes performance of two indices, Bloomberg Barclays U.S. Aggregate and S&P 500, as proxies for bond and stock markets, respectively. While neither is a benchmark for Fund performance, they provide context for returns on broad asset categories.

TOTAL RETURN ON NET ASSET VALUE FOR PERIODS ENDED MAY 31, 2017

	Actual Returns			Average Annualized Returns	
	Three Months	Six Months	One Year	Three Years	Life of Fund ⁽¹⁾
Flaherty & Crumrine Dynamic Preferred and Income Fund	4.6%	12.7%	15.5%	10.6%	11.1%
Bloomberg Barclays U.S. Aggregate Index ⁽²⁾ . . .	1.5%	2.5%	1.6%	2.5%	2.5%
S&P 500 Index ⁽³⁾	2.6%	10.8%	17.5%	10.1%	12.3%

(1) Since inception on May 29, 2013.

(2) The Bloomberg Barclays U.S. Aggregate Index is an unmanaged index considered representative of the U.S. investment grade, fixed-rate bond market.

(3) The S&P 500 is a capitalization-weighted index of 500 common stocks. The index is designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.

Current performance may be lower or higher than the quoted past performance, which cannot guarantee future results. In addition, NAV performance will vary from market price performance, and you may have a taxable gain or loss when you sell your shares.

Flows into bond and stock markets have been impressive in 2017, and this demand coupled with limited supply continued to push prices higher. As has been widely reported, stock-market volatility has reached near-record lows. Combined with low interest rates, this environment has been very supportive of risk assets.

One of the best-performing segments of the portfolio has been fixed-to-float securities that trade at a discount to par value and are nearing (or have entered) their floating rate period. For much of 2016, this segment lagged the broader market as investors were concerned about interest rates remaining low forever. However, rate hikes by the Federal Reserve both flattened the yield curve and raised prospects for further monetary tightening, narrowing the current and expected yield gap between floating-rate and fixed-rate

¹ Following the methodology required by the Securities and Exchange Commission, total return assumes dividend reinvestment.

² March 1, 2017—May 31, 2017

preferreds. Rather than a floating-rate security with a very low coupon, investors are hopeful these will now produce reasonable income with low duration—and this could lead to prices migrating back toward par value. Securities that were trading around 75% of par value are now up to the low 90% range, with many nearing par value. As of May 31, 2017, the Fund had approximately 81% in fixed-to-float securities—although there is a broad mix of dates when coupons begin to float.

It is difficult to identify laggards in the portfolio over this period as most securities turned in positive performances—but of course some did better than others. Securities with higher fixed-rate coupons and shortening call protection produced great levels of income for many years. However, given prices well above par value, it simply wasn't possible in the current interest-rate environment for their total returns to keep pace with the discount securities mentioned above.

As a reminder, there is a direct inverse relationship in fixed-income securities (including preferreds) between price and yield, and higher prices have led to lower yields on securities. The yield curve has flattened this year, and mid- to longer-term Treasury yields have remained low. At the same time, yield spreads on preferreds (above comparable Treasury yields) have narrowed. This has resulted in excellent price gains and total return for the Fund, but it also means portfolio yield has been coming down.

We maintain various levels of call protection across the portfolio to avoid concentrated exposure to any one interest-rate scenario, but in this sustained low-rate environment, reinvestment rates are below most coupons currently in the portfolio. Additionally, while securities moving from fixed to floating-rate have performed quite well this year, their floating-rate coupons are still well below their prior fixed-rate coupons. Combined with higher leverage costs, the result is likely to be lower overall levels of income that can be distributed by the Fund. We encourage you to read the topic that follows in this report for a more detailed discussion of monthly distributions to Fund Shareholders.

Lack of new-issue supply in the preferred market has been a leading factor behind market strength, as demand for preferreds must be satisfied mostly in secondary markets. If preferreds were the only asset class moving higher, we might be more guarded about the magnitude of recent price performance. However, broader bond and equity markets around the world have continued to show strength based on a supportive economic and technical backdrop. Global interest rates remain low, economic growth is moderate in developed economies, and inflation generally remains below target. We expect the path to higher U.S. interest rates will be gradual and likely accompanied by a flatter yield curve over the near-term. Combined with excellent overall credit quality at issuers of preferreds, we expect returns on preferred securities to remain competitive—albeit generated more from coupon than additional price appreciation.

We encourage you to read the discussion topics that follow, as we dig deeper into subjects mentioned here as well as others of interest to shareholders. In addition, visit the Fund's website, www.preferredincome.com, for timely and important information.

Sincerely,

The Flaherty & Crumrine Portfolio Management Team

June 30, 2017

DISCUSSION TOPICS

(Unaudited)

The Fund's Portfolio Results and Components of Total Return on NAV

The table below presents a breakdown of the components that comprise the Fund's total return on NAV over the recent six months. These components include: (a) the total return on the Fund's portfolio of securities; (b) any returns from hedging the portfolio against significant increases in long-term interest rates; (c) the impact of utilizing leverage to enhance returns to shareholders; and (d) the Fund's operating expenses. When all of these components are added together, they comprise the total return on NAV.

Components of DFP's Total Return on NAV for the Six Months Ended May 31, 2017¹

Total Return on Unleveraged Securities Portfolio (including principal change and income)	9.0%
Return from Interest Rate Hedging Strategy	N/A
Impact of Leverage (including leverage expense)	4.3%
Expenses (excluding leverage expense)	(0.6)%
<i>Total Return on NAV</i>	12.7%

¹Actual, not annualized

For the six months ended May 31, 2017 the BofA Merrill Lynch 8% Constrained Core West Preferred & Jr Subordinated Securities IndexSM (P8JC)¹ returned 7.8%. This index reflects the various segments of the preferred securities market constituting the Fund's primary focus. Since this index return excludes all expenses and the impact of leverage, it compares most directly to the top line in the Fund's performance table above (Total Return on Unleveraged Securities Portfolio).

Total Return on Market Price of Fund Shares

While our focus is primarily on managing the Fund's investment portfolio, our shareholders' actual return is comprised of the Fund's monthly dividend payments *plus* changes in the *market price* of Fund shares. During the six-month period ending May 31, 2017, total return on market price of Fund shares was 17.0%.

Historically, the preferred securities market has experienced price volatility consistent with those of other fixed-income securities. However, since mid-2007 it has become clear that preferred-security valuations, including both the Fund's NAV and the market price of its shares, can move dramatically when there is volatility in financial markets. The chart below contrasts the relative stability of the Fund's earlier period with the more recent volatility in both its NAV and market price. Many fixed-income asset classes experienced increased volatility over this period.

¹ The BofA Merrill Lynch 8% Constrained Core West Preferred & Jr Subordinated Securities IndexSM (P8JC) includes U.S. dollar-denominated investment-grade or below investment-grade, fixed rate, floating rate or fixed-to-floating rate, retail or institutionally structured preferred securities of U.S. and foreign issuers with issuer concentration capped at 8%. All index returns include interest and dividend income, and, unlike the Fund's returns, are unmanaged and do not reflect any expenses.

In a more perfect world, the market price of Fund shares and its NAV, as shown in the above chart, would track more closely. If so, any premium or discount (calculated as the difference between these two inputs and expressed as a percentage) would remain relatively close to zero. However, as can be seen in the chart below, this often has not been the case.

Although divergence between NAV and market price of a closed-end fund is generally driven by supply/demand imbalances affecting its market price, we can only speculate about why the relationship between the Fund's market price and NAV hasn't been closer.

Based on a closing price of \$26.30 on June 30th and assuming its current monthly distribution of \$0.16 does not change, the annualized yield on market price of Fund shares is 7.3%. Of course, there can be no guarantee that the Fund's dividend will not change based on market conditions.

U.S. Economic and Credit Outlook

The U.S. economy continues to grow at a moderate pace. Inflation-adjusted gross domestic product (real GDP) rose by 1.4% in the first quarter of 2017 and 2.1% over four quarters ending in March. Economists expect growth of 2.3% (Q4 to Q4) in 2017 overall.² That is slightly better than the economy's 2% average growth pace since 2011—and in-line with our own view—but it's disappointing to investors who anticipated still-faster growth under a Trump administration.

So far, little progress has been made on Trump administration policies that might affect the U.S. economy, either positively or negatively. Some regulatory burdens have been eased at the margin, but health-care reform, tax reform, fiscal stimulus, and trade and immigration policies remain largely undecided. Political stasis reinforces our view that policy change will be limited and, therefore, likely to affect economic growth and monetary policy only at the margin.

More positively, U.S. consumers remain in good shape. Employment rose by 1.6% and hourly wages were up 2.5% over 12 months ending in May. Personal income and consumption were up 3.5% and 4.2%, respectively, over the same period, while inflation was subdued. Job growth is likely to slow as the economy nears full employment (the unemployment rate was 4.3% in May), but higher wages and investment income should keep income growth around its current pace. Housing is buoyant with home sales hovering near recovery highs. Real residential investment rose 12.9% in the first quarter, and home prices have risen at a 5-6% rate. We expect personal consumption to hold at or a little above its recent pace, and housing should remain a bright spot for at least several more years.

Business spending also picked up. Real business investment rose by 10.4% in the first quarter after languishing in 2016. We expect that growth rate to ease since capacity is not yet strained, but business investment should at least keep pace with overall economic expansion.

Other segments of the U.S. economy, namely government consumption, inventories and net exports, will wax and wane from one quarter to the next, but we don't expect them to drive medium-term economic growth. It's worth noting, however, that U.S. import and export volumes rose impressively (up 6.5-7%) from 1Q2016 to 1Q2017, reflecting a quickening pace of global activity.

Inflation increased early in 2017, driven by higher labor costs, a rebound in energy prices on OPEC production cutbacks, and a weaker U.S. dollar. However, energy prices sagged recently. As a result, the consumer price index peaked at 2.7% year-over-year (YoY) in March but slowed to 1.9% YoY in May. Core CPI (excluding food and energy prices) also slowed from 2.2% to 1.7% YoY over the same period. We can't predict where energy prices will go from here, but unless they rebound substantially, headline inflation is likely to remain low for the next several quarters—although wage pressures should gradually drive inflation toward the Federal Reserve's target.

Moderate but steady economic growth along with higher inflation earlier in the year prompted the Federal Reserve to tighten monetary policy, raising its benchmark rate by 75 basis points (0.75%) since the start of the Fund's fiscal year. The Fed also outlined plans to gradually reduce the size of its portfolio, something it probably will begin in the third quarter. Despite a 75 bp jump in short-term rates, the 30-year Treasury yield actually fell from 3.07% to 2.84% over six months ending June 30. A flatter yield curve has implications for the Fund's dividends, which we discuss in a separate topic below.

² *The Livingston Survey*, June 16, 2017, Federal Reserve Bank of Philadelphia.

Although higher rates are bad news for short-term borrowers, they have been very good news for financial institutions. Most banks today are “asset-sensitive”, meaning their assets reprice more quickly than their liabilities. As short-term rates rose, bank earnings improved substantially. Banks dramatically increased capital and liquidity since the financial crisis, but earnings had lagged. With earnings now picking up, it appears that a long period of capital accumulation at U.S. banks is coming to a close. In June, the Federal Reserve concluded its annual review of whether large banks have adequate capital and gave them a green light to return a greater share of earnings to shareholders through common stock buybacks and dividends. As investors in preferred securities, we are heartened by stronger earnings but worry about capital erosion. We believe banks (and their regulators) will balance capital returns with balance sheet strength, but it is something we will watch closely.

Looking beyond banks, credit fundamentals remain good in most other sectors. Energy companies have learned to live with lower prices for their products, and higher domestic production has boosted prospects for pipeline companies. Like banks, property and casualty insurance companies have benefitted from higher rates. However, life insurance companies, which purchase long-duration assets to match their long-term liabilities, should do better if long-term rates move up a bit too. REITs generally demonstrate high occupancy and strong fixed-charge coverage, although some retail-oriented REITs face rising vacancies. Utilities operate in a challenging environment of flat-to-lower demand for electricity along with rising costs for transmission, distribution and various environmental and renewables mandates. They remain strong financially, but leverage is creeping up. On balance, credit quality in the Fund’s portfolio remains sound—although a long period of improving credit fundamentals appears to be transitioning to one of overall stability.

As we noted in our opening letter, preferred securities attracted strong demand in the first half of this fiscal year, pushing down both overall preferred yields and their spreads to benchmark Treasuries. Although yields are materially lower, they are supported by a benign macroeconomic environment and good credit quality. We believe preferred securities remain attractive relative to other fixed-income alternatives, especially on an after-tax basis for taxable U.S. investors.

Monthly Distributions to Fund Shareholders

Over the past 18 months, the Federal Reserve has raised its target for the federal funds rate by a total of 1.00%, after seven years of near-zero interest rates. A target rate of 1.25% is still accommodative and consistent with the Fed’s go-slow approach. However, the Fed has hiked four times this cycle and Federal Open Market Committee (FOMC) members are still projecting another possible increase later in 2017.

In response, short-term interest rates have continued to move higher to reflect actual and expected adjustments in the Fed’s target. The Fund’s cost of leverage is linked to 3-month LIBOR, and the average cost of leverage was 1.0% for fiscal 2015, 1.4% for fiscal 2016, and the current rate would be 2.2% if reset today (actual resets occur quarterly). In addition to increases in 3-month LIBOR, the spread payable by the Fund over this rate also increased from 0.75% to 0.90% as of December 1, 2016. Although increased bank regulation has been a positive for credit quality and investments in the portfolio, costs associated with stiffer regulation get passed on to clients of a bank—and our leverage is bank-financed.

We have written many times about why the Fund continues to use leverage when short-term rates are moving higher and the implications of a possible hedging program for the cost of leverage. Rather than repeat the discussion here, we would point readers to this topic in the November 30, 2015 Annual Report, which can be found on the website at www.preferredincome.com.

In addition to increased cost of leverage, the Fund experienced modest issuer redemptions in the investment portfolio, requiring reinvestment of proceeds. In today's rate environment, reinvestment coupons are lower than coupons being redeemed. This reinvestment process puts pressure on top-line earnings from the portfolio, again reducing distributable income.

These factors are incorporated into our dividend-setting process, and are also a normal part of the way credit markets function. Interest rates are not static, and neither are credit spreads. The portfolio is designed to have a wide range of coupons, call protection, and security structures—and each aspect will change over time. We seek to maintain a level of call protection in the portfolio to stagger the impact of changes in interest rates and credit spreads, but the portfolio will normally contain at least a portion subject to being called based on current market conditions. Leverage is utilized in the Fund to increase income and returns to shareholders, and leverage remains beneficial to distributable income even though its cost has increased.

The primary objective of the Fund is total return, with an emphasis on high current income, and we believe the Fund will continue to meet that objective—even though distributable income may be reduced as we proceed through this economic cycle. Reductions are simply a reflection of changes in interest rates and credit spreads that have cumulated over time, but relative to fixed-income alternatives, the level of income produced should remain attractive. Fund shareholders have benefited from years of record-low interest rates and low leverage costs, but rates are beginning to come back into balance as the economic outlook improves. We believe the Fund's strategy of investing in preferred securities and using leverage in an efficient manner will continue to produce a competitive distribution rate for shareholders.

* Assumes reinvestment of distributions at the price obtained by the Fund's Dividend Reinvestment and Cash Purchase Plan.

** Annualized.

*** Not annualized.

† The net investment income ratios reflect income net of operating expenses, including interest expense.

†† Information presented under heading Supplemental Data includes loan principal balance.

⁽¹⁾ Commencement of operations.

⁽²⁾ Net asset value at beginning of period reflects the deduction of the sales load of \$1.125 per share and offering costs of \$0.05 per share paid by the shareholder from the \$25.00 offering price.

⁽³⁾ Total return on net asset value is calculated assuming a purchase at the offering price of \$25.00 on the inception date of trading (May 29, 2013) less the sales load of \$1.125 and offering costs of \$0.05 and the ending net asset value per share. Total return on market value is calculated assuming a purchase at the offering price of \$25.00 on the inception date of trading (May 29, 2013) and the sale at the current market price on the last day of the period. Total return on net asset value and total return on market value are not computed on an annualized basis.

⁽⁴⁾ See Note 8.

The accompanying notes are an integral part of the financial statements.

FINANCIAL HIGHLIGHTS (Unaudited) (Continued)

Per Share of Common Stock

	<u>Total Dividends Paid</u>	<u>Net Asset Value</u>	<u>NYSE Closing Price</u>	<u>Dividend Reinvestment Price ⁽¹⁾</u>
December 30, 2016	\$0.1800	\$24.20	\$23.77	\$23.75

Asset Coverage per \$1,000 of Debt ⁽²⁾	3,076	2,916	2,939	3,018	2,972

* Unaudited.

⁽¹⁾ See Note 8.

⁽²⁾ Calculated by subtracting the Fund's total liabilities (excluding the loan) from the Fund's total assets and dividing that amount by the loan outstanding in 000's.

1. Organization

Flaherty & Crumrine Dynamic Preferred and Income Fund Incorporated (the “Fund”) was incorporated as a Maryland corporation on October 10, 2012, and commenced operations on May 29, 2013 as a non-diversified, closed-end management investment company under the Investment Company Act of 1940, as amended (the “1940 Act”). The Fund’s investment objective is to seek total return, with an emphasis on high current income.

2. Significant Accounting Policies

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements. The preparation of the financial statements is in conformity with U.S. generally accepted accounting principles (“U.S. GAAP”) and requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities in the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates.

Portfolio valuation: The net asset value of the Fund’s Common Stock is determined by the Fund’s Administrator daily in accordance with the policies and procedures approved by the Board of Directors (the “Board”) of the Fund. It is determined by dividing the value of the Fund’s net assets available to Common Stock by the number of shares of Common Stock outstanding. The value of the Fund’s net assets available to Common Stock is deemed to equal the value of the Fund’s total assets less (i) the Fund’s liabilities and (ii) the aggregate liquidation value of any outstanding preferred stock.

The Fund’s preferred and debt securities are valued on the basis of current market quotations provided by independent pricing services or dealers approved by the Board of the Fund. Each quotation is based on the mean of the bid and asked prices of a security. In determining the value of a particular preferred or debt security, a pricing service or dealer may use information with respect to transactions in such investments, quotations, market transactions in comparable investments, various relationships observed in the market between investments, and/or calculated yield measures based on valuation technology commonly employed in the market for such investments. Common stocks that are traded on stock exchanges are valued at the last sale price or official close price on the exchange, as of the close of business on the day the securities are being valued or, lacking any sales, at the last available mean price. Futures contracts and option contracts on futures contracts are valued on the basis of the settlement price for such contracts on the primary exchange on which they trade. Investments in over-the-counter derivative instruments, such as interest rate swaps and options thereon (“swaptions”), are valued using prices supplied by a pricing service, or if such prices are unavailable, prices provided by a single broker or dealer that is not the counterparty or, if no such prices are available, at a price at which the counterparty to the contract would repurchase the instrument or terminate the contract. Investments for which market quotations are not readily available or for which management determines that the prices are not reflective of current market conditions are valued at fair value as determined in good faith by or under the direction of the Board of the Fund, including reference to valuations of other securities which are comparable in quality, maturity and type.

NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

Investments in money market instruments and all debt and preferred securities which mature in 60 days or less are valued at amortized cost, provided such amount approximates market value. Investments in money market funds are valued at the net asset value of such funds.

Fair Value Measurements: The Fund has analyzed all existing investments to determine the significance and character of all inputs to their fair value determination. The levels of fair value inputs used to measure the Fund's investments are characterized into a fair value hierarchy. Where inputs for an asset or liability fall into more than one level in the fair value hierarchy, the investment is classified in its entirety based on the lowest level input that is significant to that investment's valuation. The three levels of the fair value hierarchy are described below:

- Level 1 – quoted prices in active markets for identical securities
- Level 2 – other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 – significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. Transfers in and out of levels are recognized at market value at the end of the period.

A summary of the inputs used to value the Fund's investments as of May 31, 2017 is as follows:

	Total Value at May 31, 2017	Level 1 Quoted Price	Level 2 Significant Observable Inputs	Level 3 Significant Unobservable Inputs
Preferred Securities				
Banking	\$422,962,442	\$366,853,396	\$ 56,109,046	\$—
Financial Services	2,397,836	875,036	1,522,800	—
Insurance	164,670,787	91,588,662	73,082,125	—
Utilities	42,290,889	34,380,179	7,910,710	—
Energy	45,631,817	16,832,657	28,799,160	—

Total Investments	\$736,006,388	\$555,196,172	\$180,810,216	\$—

NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

During the reporting period, securities with an aggregate market value of \$1,931,558 were transferred into Level 1 from Level 2. The securities were transferred due to an increase in the quantity and quality of information related to trading activity or broker quotes for these securities. During the period, there were no transfers into Level 2 from Level 1. During the reporting period, there were no transfers into or out of Level 3.

The fair values of the Fund's investments are generally based on market information and quotes received from brokers or independent pricing services that are approved by the Board and are unaffiliated with the Adviser. To assess the continuing appropriateness of security valuations, management, in consultation with the Adviser, regularly compares current prices to prior prices, prices across comparable securities, actual sale prices for securities in the Fund's portfolio, and market information obtained by the Adviser as a function of being an active market participant.

Securities with quotes that are based on actual trades or actionable bids and offers with a sufficient level of activity on or near the measurement date are classified as Level 1. Securities that are priced using quotes derived from implied values, indicative bids and offers, or a limited number of actual trades—or the same information for securities that are similar in many respects to those being valued—are classified as Level 2. If market information is not available for securities being valued, or materially-comparable securities, then those securities are classified as Level 3. In considering market information, management evaluates changes in liquidity, willingness of a broker to execute at the quoted price, the depth and consistency of prices from pricing services, and the existence of observable trades in the market.

Securities transactions and investment income: Securities transactions are recorded as of the trade date. Realized gains and losses from securities sold are recorded on the specific identified cost basis. Dividend income is recorded on ex-dividend dates. Interest income is recorded on the accrual basis. The Fund also amortizes premiums and accretes discounts on fixed income securities using the effective yield method.

Options: Purchases of options are recorded as an investment, the value of which is marked-to-market at each valuation date. When the Fund enters into a closing sale transaction, the Fund will record a gain or loss depending on the difference between the purchase and sale price.

When the Fund writes an option, an amount equal to the premium received by the Fund is recorded as a liability, the value of which is marked-to-market at each valuation date. When a written option expires, the Fund realizes a gain equal to the amount of the premium originally received. When the Fund enters into a closing purchase transaction, the Fund realizes a gain (or loss if the cost of the closing purchase transaction exceeds the premium received when the option was written) without regard to any unrealized gain or loss on the underlying security, and the liability related to such option is eliminated. When a call option is exercised, the Fund realizes a gain or loss from the sale of the underlying security and the proceeds from such sale are increased by the amount of the premium originally received. When a put option is exercised, the amount of the premium originally received will reduce the cost of the security which the Fund purchased upon exercise.

Repurchase agreements: The Fund may engage in repurchase agreement transactions. The Adviser reviews and approves the eligibility of the banks and dealers with which the Fund may enter into repurchase agreement transactions. The value of the collateral underlying such transactions must be at least equal at all times to the total amount of the repurchase obligations, including interest. The Fund maintains possession of

NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

the collateral through its custodian and, in the event of counterparty default, the Fund has the right to use the collateral to offset losses incurred. There is the possibility of loss to the Fund in the event the Fund is delayed or prevented from exercising its rights to dispose of the collateral securities.

Federal income taxes: The Fund intends to continue to qualify as a regulated investment company by complying with the requirements under subchapter M of the Internal Revenue Code of 1986, as amended (the “Code”), applicable to regulated investment companies and intends to distribute substantially all of its taxable net investment income to its shareholders. Therefore, no federal income tax provision is required.

Management has analyzed the Fund’s tax positions taken on federal income tax returns for all open tax years (November 30, 2016, 2015 and 2014), and has concluded that no provision for federal income tax is required in the Fund’s financial statements. The Fund’s major tax jurisdictions are federal and the State of California. The Fund’s federal and state income and federal excise tax returns for tax years for which the applicable statutes of limitations have not expired are subject to examination by the Internal Revenue Service and state departments of revenue.

Dividends and distributions to shareholders: The Fund expects to declare dividends on a monthly basis to holders of Common Stock (“Shareholders”). Distributions to Shareholders are recorded on the ex-dividend date. Any net realized short-term capital gains will be distributed to Shareholders at least annually. Any net realized long-term capital gains may be distributed to Shareholders at least annually or may be retained by the Fund as determined by the Fund’s Board. Capital gains retained by the Fund are subject to tax at the capital gains corporate tax rate. Subject to the Fund qualifying as a regulated investment company, any taxes paid by the Fund on such net realized long-term capital gains may be used by the Fund’s Shareholders as a credit against their own tax liabilities. The Fund may pay distributions in excess of the Fund’s net investment company taxable income and this excess would be a tax-free return of capital distributed from the Fund’s assets.

Income and capital gain distributions are determined and characterized in accordance with income tax regulations which may differ from U.S. GAAP. These differences are primarily due to (1) differing treatments of income and gains on various investment securities held by the Fund, including timing differences, (2) the attribution of expenses against certain components of taxable investment income, and (3) federal regulations requiring proportionate allocation of income and gains to all classes of shareholders.

Distributions from net realized gains for book purposes may include short-term capital gains, which are included as ordinary income for tax purposes, and may exclude amortization of premium and discount on certain fixed income securities, which are not reflected in ordinary income for tax purposes. The tax character of distributions paid during 2017 and 2016 were as follows:

	<u>Distributions paid in fiscal year 2017</u>		<u>Distributions paid in fiscal year 2016</u>	
	<u>Ordinary Income</u>	<u>Long-Term Capital Gains</u>	<u>Ordinary Income</u>	<u>Long-Term Capital Gains</u>
Common Stock	N/A	N/A	\$36,781,791	\$0

NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

As of November 30, 2016, the components of distributable earnings (i.e., ordinary income and capital gain/loss) available to Shareholders, on a tax basis, were as follows:

<u>Capital (Loss) Carryforward</u>	<u>Undistributed Ordinary Income</u>	<u>Undistributed Long-Term Gain</u>	<u>Net Unrealized Appreciation/(Depreciation)</u>
\$(830,491)	\$3,076,679	\$0	\$3,196,922

The composition of the Fund's accumulated realized capital losses is indicated below. These losses may be carried forward and offset against future capital gains through the dates listed below. During the fiscal year ended November 30, 2016, the Fund utilized \$412,078 of capital losses.

<u>No Expiration Short Term</u>	<u>No Expiration Long Term</u>	<u>Total</u>
\$830,491	\$0	\$830,491

Excise tax: The Code imposes a 4% nondeductible excise tax on the Fund to the extent the Fund does not distribute by the end of any calendar year at least (1) 98% of the sum of its net investment income for that year and 98.2% of its capital gains (both long-term and short-term) for its fiscal year and (2) certain undistributed amounts from previous years. The Fund paid \$79,370 of federal excise taxes attributable to calendar year 2016 in March 2017.

Additional Accounting Standards: In October 2016, the U.S. Securities and Exchange Commission adopted new rules and amended existing rules (together, "final rules") intended to modernize the reporting and disclosure of information by registered investment companies. In part, the final rules amend Regulation S-X and require standardized, enhanced disclosure about derivatives in investment company financial statements, as well as other amendments. The compliance date for the amendments to Regulation S-X is August 1, 2017. Although the Fund currently has no investments in derivatives, it has authority to invest in them. Management is evaluating the impact that adoption of amendments to Regulation S-X could have on the Fund's financial statements and related disclosures.

3. Derivative Instruments

The Fund intends to use derivatives primarily to economically hedge against risks in the portfolio, namely interest rate risk and credit risk. The Fund may use options on Treasury futures contracts for the purpose of economically hedging against a significant increase in long-term interest rates. If the strategy is employed, the Fund would purchase put options on Treasury futures contracts that would increase in value if long-term interest rates increased significantly, offsetting some of the related decline in portfolio asset values. The Fund may also purchase and write call options on Treasury futures contracts to supplement the put option strategy and also to reduce the overall cost of the interest rate hedge (by earning premiums from the net sale of call options).

The Fund has the authority to use other derivatives for hedging or to increase expected return, but has not employed any of these derivatives to-date and does not anticipate broad use of these derivatives in the near future (although this may change without advance notice). Other approved derivatives strategies include: buying and selling credit default swaps, interest rate swaps and options thereon (swaptions), and options on

NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

securities. Accounting policies for specific derivatives, including the location of these items in the financial statements, are included in Note 2 as appropriate. No assurance can be given that such use of derivatives will achieve their desired purposes or, in the case of hedging, will result in an overall reduction of risk to the Fund.

The Fund did not use any derivatives during the six months ended May 31, 2017 and the fiscal year ended November 30, 2016.

Options on Financial Futures Contracts: When an interest rate hedging strategy is employed, the Fund intends to use options on financial futures contracts in much the same way as described above. The risk associated with purchasing options, and therefore the maximum loss the Fund would incur, is limited to the purchase price originally paid. The risk in writing a call option is that the Fund may forego the opportunity for profit if the market price of the underlying security increases and the option is exercised. The risk in writing a put option is that the Fund may incur a loss if the market price of the underlying security decreases and the option is exercised.

4. Investment Advisory Fee, Servicing Agent Fee, Administration Fee, Transfer Agent Fee, Custodian Fee, Directors' Fees and Chief Compliance Officer Fee

Flaherty & Crumrine Incorporated (the "Adviser") serves as the Fund's investment adviser. The Fund pays the Adviser a monthly fee at an annual rate of 0.575% of the Fund's average daily managed assets up to \$200 million and 0.50% of the Fund's average daily managed assets of \$200 million or more. For purposes of calculating such a fee "managed assets" means the Fund's net assets, plus the principal amount of loans from financial institutions or debt securities issued by the Fund, the liquidation preference of preferred stock issued by the Fund, if any, and the proceeds of any reverse repurchase agreements entered into by the Fund.

Destra Capital Investments LLC (the "Servicing Agent") serves as the Fund's shareholder servicing agent. As compensation for its services, the Fund pays the Servicing Agent a fee computed and paid monthly at the annual rate of 0.10% of the Fund's Average Net Assets, for the remainder of the term of the agreement. For these purposes, "Average Net Assets" are the average daily net assets available to the Fund's common shareholders.

BNY Mellon Investment Servicing (US) Inc. ("BNY Mellon") serves as the Fund's administrator (the "Administrator"). As Administrator, BNY Mellon calculates the net asset value of the Fund's shares attributable to Common Stock and generally assists in all aspects of the Fund's administration and operation. As compensation for BNY Mellon's services as Administrator, the Fund pays BNY Mellon a monthly fee at an annual rate of 0.10% of the first \$200 million of the Fund's average daily total managed assets, 0.04% of the next \$300 million of the Fund's average daily total managed assets, 0.03% of the next \$500 million of the Fund's average daily total managed assets and 0.02% of the Fund's average daily total managed assets above \$1 billion. For purposes of calculating such fee, the Fund's total managed assets means the total assets of the Fund (including any assets attributable to the Fund's preferred stock that may be outstanding or otherwise attributable to the use of leverage) minus the sum of accrued liabilities (other than debt, if any, representing financial leverage).

NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

BNY Mellon (c/o, Computershare) also serves as the Fund's Common Stock dividend-paying agent and registrar (the "Transfer Agent"). As compensation for BNY Mellon's services as Transfer Agent, the Fund pays BNY Mellon a monthly fee in the amount of \$1,500, plus certain out of pocket expenses.

The Bank of New York Mellon (the "Custodian") serves as the Fund's Custodian. As compensation for the Custodian's services as custodian, the Fund pays the Custodian a monthly fee at the annual rate of 0.01% of the first \$200 million of the Fund's average daily total managed assets, 0.008% of the next \$300 million of the Fund's average daily total managed assets, 0.006% of the next \$500 million of the Fund's average daily total managed assets, and 0.005% of the Fund's average daily total managed assets above \$1 billion. For purposes of calculating such fee, the Fund's total managed assets means the total assets of the Fund (including any assets attributable to any Fund auction rate preferred stock that may be outstanding or otherwise attributable to the use of leverage) minus the sum of accrued liabilities (other than debt, if any, representing financial leverage).

The Fund pays each Director who is not a director, officer or employee of the Adviser a fee of \$9,000 per annum, plus \$750 for each in-person meeting of the Board of Directors or Audit Committee, \$500 for each in-person meeting of the Nominating Committee attended, and \$250 for each telephone meeting attended. The Audit Committee Chair receives an additional annual fee of \$3,000. The Fund also reimburses all Directors for travel and out-of-pocket expenses incurred in connection with such meetings.

The Fund pays the Adviser a fee of \$35,000 per annum for Chief Compliance Officer services and reimburses out-of-pocket expenses incurred in connection with providing services in this role.

5. Purchases and Sales of Securities

For the six months ended May 31, 2017, the cost of purchases and proceeds from sales of securities, excluding short-term investments, aggregated \$70,705,723 and \$70,156,187, respectively.

At May 31, 2017, the aggregate cost of securities for federal income tax purposes was \$693,547,787, the aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost was \$53,003,424 and the aggregate gross unrealized depreciation for all securities in which there was an excess of tax cost over value was \$10,544,823.

6. Common Stock

At May 31, 2017, 240,000,000 shares of \$0.01 par value Common Stock were authorized.

Common Stock transactions were as follows:

	Six Months Ended 05/31/17		Year Ended 11/30/16	
	Shares	Amount	Shares	Amount
Shares issued under the Dividend Reinvestment and Cash Purchase Plan	819	20,401	687	\$16,481

NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

7. Preferred Stock

The Fund has the authority to issue 10,000,000 shares of \$0.01 par value preferred stock. The Fund does not currently have any issued and outstanding shares of preferred stock.

8. Committed Financing Agreement

The Fund has entered into a committed financing agreement with BNP Paribas Prime Brokerage International, Ltd. ("Financing Agreement") that allows the Fund to borrow on a secured basis, which the Fund uses in the normal course of business as financial leverage. Such leveraging tends to magnify both the risks and opportunities to Shareholders. As of May 31, 2017, the committed amount, amount borrowed, under the Financing Agreement was \$241.3 million.

Effective December 1, 2016, the lender charges an annualized rate of 0.80% on the undrawn (committed) balance, and three-month LIBOR (reset quarterly) plus 0.90% on the drawn (borrowed) balance. Prior to December 1, 2016, the lender charged an annualized rate of 0.65% on the undrawn balance, and three-month LIBOR (reset quarterly) plus 0.75% on the drawn balance. For the six months ended May 31, 2017, the daily weighted average annualized interest rate on the drawn balance was 1.92% and the average daily loan balance was \$241,300,000. LIBOR rates may vary in a manner unrelated to the income received on the Fund's assets, which could have either a beneficial or detrimental impact on net investment income and gains available to Shareholders.

The Fund is required to meet certain asset coverage requirements under the Financing Agreement and under the 1940 Act. In accordance with the asset coverage requirements, at least two-thirds of the Fund's assets are expected to be pledged as collateral assuming the full committed amount is drawn. Securities pledged as collateral are identified in the portfolio of investments. If the Fund fails to meet these requirements, or maintain other financial covenants required under the Financing Agreement, the Fund may be required to repay immediately, in part or in full, the amount borrowed under the Financing Agreement. Additionally, failure to meet the foregoing requirements or covenants could restrict the Fund's ability to pay dividends to Shareholders and could necessitate sales of portfolio securities at inopportune times. The Financing Agreement has no stated maturity, but may be terminated by either party without cause with six months' advance notice.

Under the terms of the Financing Agreement, the lender has the ability to borrow a portion of the securities pledged as collateral against the loan ("Rehypothecated Securities"), subject to certain limits. In connection with any Rehypothecated Securities, the Fund receives a fee from the lender equal to the greater of (x) 0.05% of the value of the Rehypothecated Securities and (y) 70% of net securities lending income. The Fund may recall any Rehypothecated Security at any time and the lender is required to return the security in a timely fashion. In the event the lender does not return the security, the Fund will have the right to, among other things, apply and set off an amount equal to 100% of the then-current fair market value of such Rehypothecated Securities against any loan amounts owed to the lender under the Financing Agreement. Rehypothecated Securities are marked-to-market daily and adjusted as necessary so the value of all Rehypothecated Securities does not exceed 100% of the loan amount under the Financing Agreement. The Fund will continue to earn and receive all dividends, interest, and other distributions on Rehypothecated

NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

Securities. Rehypothecated Securities are identified in the Portfolio of Investments, and fees earned from rehypothecation are included in the Statement of Operations.

9. Portfolio Investments, Concentration and Investment Quality

Under normal market conditions, the Fund invests at least 80% of its “managed assets” in a portfolio of preferred and other income-producing securities issued by U.S. and non-U.S. companies, including traditional preferred stock, hybrid and trust preferred securities that have characteristics of both equity and debt securities, convertible securities, subordinated debt, and senior debt. “Managed assets” means the Fund’s net assets, plus the principal amount of loans from financial institutions or debt securities issued by the Fund, the liquidation preference of preferred stock issued by the Fund, if any, and the proceeds of any reverse repurchase agreements entered into by the Fund. Also, under normal market conditions, the Fund will invest more than 25% of its total assets in the financials sector, which for this purpose is comprised of the bank, thrifts and mortgage finance, diversified financial services, finance, consumer finance, capital markets, asset management and custody, investment banking and brokerage, insurance, insurance brokerage, and real estate investment trust (“REIT”) industries. From time to time, the Fund may have 25% or more of its total assets invested in any one of these industries. The Fund’s portfolio may therefore be subject to greater risk and market fluctuation than a portfolio of securities representing a broader range of investment alternatives.

The Fund will invest at least 80% of its managed assets in (a) investment grade quality securities or (b) below investment grade quality securities of companies with investment grade senior unsecured debt outstanding, in either case determined at the time of purchase. Consequently, the Fund may invest up to 20% of its managed assets in securities of companies with below investment grade quality senior unsecured debt outstanding. In addition, the Fund may invest in unrated securities that the Fund’s investment adviser deems to be comparable in quality to rated issues in which the Fund is authorized to invest.

The Fund may invest up to 15% of its managed assets in common stocks, and up to 100% of its managed assets in securities of non-U.S. companies. Investments may include U.S. dollar-denominated securities and non-U.S. dollar-denominated securities issued by companies organized or headquartered in foreign countries and/or doing significant business outside the United States.

The Fund may employ certain investment techniques in accordance with its fundamental investment policies. These may include the use of when-issued and delayed delivery transactions. Securities purchased or sold on a when-issued or delayed delivery basis may be settled within 45 days after the date of the transaction. The Fund may also enter into transactions, in accordance with its investment policies, involving short sales of securities and purchases of securities on margin. Such transactions may expose the Fund to credit and market valuation risk greater than that associated with regular trade settlement procedures.

10. Subsequent Events

Management has evaluated the impact of all subsequent events on the Fund through the date the financial statements were issued, and has determined that there were no subsequent events requiring recognition or disclosure in the financial statements.

ADDITIONAL INFORMATION (Unaudited)

Dividend Reinvestment and Cash Purchase Plan

Under the Fund's Dividend Reinvestment and Cash Purchase Plan (the "Plan"), a Shareholder whose Common Stock is registered in his or her own name will have all distributions reinvested automatically by BNY Mellon as agent under the Plan, unless the Shareholder elects to receive cash. Registered Shareholders may elect to receive cash by contacting BNY Mellon at the number provided below. If shares are registered in the name of a broker-dealer or other nominee (that is, in "street name") and the broker or nominee participates in the Plan, distributions may be reinvested by the broker or nominee in additional shares under the Plan, unless the Shareholder elects to receive distributions in cash. Shareholders may elect to receive cash by contacting their broker or nominee. A Shareholder who holds Common Stock registered in the name of a broker or other nominee may not be able to transfer the Common Stock to another broker or nominee and continue to participate in the Plan. Investors who own Common Stock registered in street name should consult their broker or nominee for details regarding reinvestment.

The number of shares of Common Stock distributed to participants in the Plan in lieu of a cash dividend is determined in the following manner. Whenever the market price per share of the Fund's Common Stock is equal to or exceeds the net asset value per share on the valuation date, participants in the Plan will be issued new shares valued at the higher of net asset value or 95% of the then current market value. Otherwise, BNY Mellon will buy shares of the Fund's Common Stock in the open market, on the New York Stock Exchange or elsewhere, on or shortly after the payment date of the dividend or distribution and continuing until the ex-dividend date of the Fund's next distribution to holders of the Common Stock or until it has expended for such purchases all of the cash that would otherwise be payable to the participants. The number of purchased shares that will then be credited to the participants' accounts will be based on the average per share purchase price of the shares so purchased, including brokerage commissions. If BNY Mellon commences purchases in the open market and the then current market price of the shares (plus any estimated brokerage commissions) subsequently exceeds their net asset value most recently determined before the completion of the purchases, BNY Mellon will attempt to terminate purchases in the open market and cause the Fund to issue the remaining dividend or distribution in shares. In this case, the number of shares received by the participant will be based on the weighted average of prices paid for shares purchased in the open market and the price at which the Fund issues the remaining shares. These remaining shares will be issued by the Fund at the higher of net asset value or 95% of the then current market value.

Plan participants are not subject to any charge for reinvesting dividends or capital gains distributions. Each Plan participant will, however, bear a proportionate share of brokerage commissions incurred with respect to BNY Mellon's open market purchases in connection with the reinvestment of dividends or capital gains distributions. For the six months ended May 31, 2017, \$42 in brokerage commissions were incurred.

The automatic reinvestment of dividends and capital gains distributions will not relieve Plan participants of any income tax that may be payable on the dividends or capital gains distributions. A participant in the Plan will be treated for Federal income tax purposes as having received, on the dividend payment date, a dividend or distribution in an amount equal to the cash that the participant could have received instead of shares.

ADDITIONAL INFORMATION (Unaudited) (Continued)

In addition to acquiring shares of Common Stock through the reinvestment of cash dividends and distributions, a shareholder may invest any further amounts from \$100 to \$3,000 semi-annually at the then current market price in shares purchased through the Plan. Such semi-annual investments are subject to any brokerage commission charges incurred by BNY Mellon under the Plan.

A shareholder whose Common Stock is registered in his or her own name may terminate participation in the Plan at any time by notifying BNY Mellon in writing, by completing the form on the back of the Plan account statement and forwarding it to BNY Mellon, or by calling BNY Mellon, directly. A termination will be effective immediately if notice is received by BNY Mellon not less than 10 days before any dividend or distribution record date. Otherwise, the termination will be effective, and only with respect to any subsequent dividends or distributions, on the first day after the dividend or distribution has been credited to the participant's account in additional shares of the Fund. Upon termination and according to a participant's instructions, BNY Mellon will either (a) issue certificates for the whole shares credited to the shareholder's Plan account and a check representing any fractional shares or (b) sell the shares in the market. Shareholders who hold Common Stock registered in the name of a broker or other nominee should consult their broker or nominee to terminate participation.

The Plan is described in more detail in the Fund's Plan brochure. Information concerning the Plan may be obtained from BNY Mellon at 1-866-351-7446.

Proxy Voting Policies and Proxy Voting Record on Form N-PX

The Fund files Form N-PX with its complete proxy voting record for the twelve months ended June 30th no later than August 31st of each year. The Fund filed its latest Form N-PX with the Securities and Exchange Commission ("SEC") on August 1, 2016 as amended on August 30, 2016. These filings, as well as the Fund's proxy voting policies and procedures, are available (i) without charge, upon request, by calling the Fund's Transfer Agent at 1-866-351-7446 and (ii) on the SEC's website at www.sec.gov. In addition, the Fund's proxy voting policies and procedures are available on the Fund's website at www.preferredincome.com.

Portfolio Schedule on Form N-Q

The Fund files a complete schedule of portfolio holdings with the SEC for the first and third fiscal quarters on Form N-Q, the latest of which was filed for the quarter ended February 28, 2017. The Fund's Form N-Q is available on the SEC's website at www.sec.gov or may be viewed and obtained from the SEC's Public Reference Room in Washington D.C. Information on the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330.

ADDITIONAL INFORMATION (Unaudited) (Continued)

Meeting of Shareholders

On April 19, 2017, the Fund held its Annual Meeting of Shareholders for the purpose of electing Directors of the Fund. The proposal was approved by the shareholders and the results of the voting are as follows:

Name	For	Withheld
Karen H. Hogan	16,367,856.231	139,805.700

Messrs. R. Eric Chadwick, David Gale and Morgan Gust continue to serve in their capacities as Directors of the Fund.

Flaherty & Crumrine Dynamic Preferred and Income Fund Incorporated

ADDITIONAL INFORMATION (Unaudited) (Continued)

Information about Fund Directors and Officers

The business and affairs of the Fund are managed under the direction of the Fund's Board of Directors. Information pertaining to the Directors and officers of the Fund is set forth below.

Name, Address, and Age	Current Position(s) Held with Fund	Term of Office and Length of Time Served*	Principal Occupation(s) During Past Five Years	Number of Funds In Fund Complex Overseen by Director**	Other Public Company Board Memberships During Past Five Years
NON-INTERESTED DIRECTORS:					
Morgan Gust 301 E. Colorado Boulevard Suite 720 Pasadena, CA 91101 Age: 70	Lead Director and Nominating and Governance Committee Chair	Class III Director since inception	Owner and operator of various entities engaged in agriculture and real estate.	5	CoBiz, Financial, Inc. (financial services) through September 2015.
David Gale 301 E. Colorado Boulevard Suite 720 Pasadena, CA 91101 Age: 68	Director	Class II Director since inception	President of Delta Dividend Group, Inc. (investments).	5	Emmis Communications through 2012.
Karen H. Hogan*** 301 E. Colorado Boulevard Suite 720 Pasadena, CA 91101 Age: 56	Director and Audit Committee Chair	Class I Director since October 2016; Class II Director since inception – 2016	Board Member, IKAR, a non-profit organization; Active Committee Member and Volunteer to several non-profit organizations.	5	None

* The Fund's Board of Directors is divided into three classes, each class having a term of three years. Each year the term of office of one class expires and the successor or successors elected to such class serve for a three year term. The three year term for each class expires as follows:

Class I Director – three year term expires at the Fund's 2020 Annual Meeting of Shareholders; director may continue in office until his successor is duly elected and qualifies.

Class II Director – three year term expires at the Fund's 2018 Annual Meeting of Shareholders; director may continue in office until his successor is duly elected and qualifies.

Class III Directors – three year term expires at the Fund's 2019 Annual Meeting of Shareholders; directors may continue in office until their successors are duly elected and qualify.

BOARD CONSIDERATION AND APPROVAL OF CONTINUANCE OF INVESTMENT ADVISORY AGREEMENT

On January 23, 2017, the Board of Directors (the “Board”) of the Flaherty & Crumrine Dynamic Preferred and Income Fund Incorporated (the “Fund”) approved the continuation of the existing investment advisory agreement with Flaherty & Crumrine Incorporated (the “Adviser”) (the “Agreement”). The following paragraphs summarize the material information and factors considered by the Board, including the Board members who are not “interested persons” (as defined in the Investment Company Act of 1940, as amended) of the Fund, as well as their conclusions relative to such factors.

In considering whether to approve the Fund’s Agreement, the Board members considered and discussed a substantial amount of information and analysis provided, at the Board’s request, by the Adviser. The Board members also considered detailed information regarding performance and expenses of other investment companies thought to be generally comparable to the Fund. The Board members discussed with management this and other information relating to the Agreement during the Special Meeting held on January 17, 2017 for that specific purpose. In reaching their determinations relating to continuance of the Agreement, the Board members considered these discussions and all other factors they believed relevant, including the factors discussed below and their multi-year experience as directors of the Fund. In their deliberations, Board members did not identify any particular information that was all-important or controlling, and Board members may have attributed different weights to the various factors. The Board members evaluated this information, and all other information available to them, for the Fund. In particular, the Board members focused on the following with respect to the Fund.

Nature, Extent and Quality of Services

The Board members reviewed in detail the nature and extent of services provided by the Adviser and the quality of those services over the past year and since inception. The Board members noted that these services included managing the Fund’s investment program, as well as the continued provision of significant administrative services beyond what the Agreement required. The Board members noted that the Adviser also provided, generally at its expense: office facilities for use by the Fund; personnel responsible for supervising the performance of administrative, accounting and related services; and investment compliance monitoring. The Board members also considered the Adviser’s sound financial condition and the Adviser’s commitment to its business. The Board members evaluated the Adviser’s services based on their direct experience serving as Directors for many years, focusing on (i) the Adviser’s knowledge of the preferred securities market generally, (ii) the Adviser’s internal resources dedicated to identifying opportunities to add additional value through hedging and other sophisticated financial transactions, and (iii) the Adviser’s culture of compliance. The Board members reviewed the personnel responsible for providing services to the Fund and observed that, based on their experience and interaction with the Adviser: (1) the Adviser’s personnel exhibited a high level of personal integrity, diligence and attention to detail in carrying out their responsibilities under the Agreement; (2) the Adviser was responsive to requests of the Board, and its personnel were available between Board meetings to answer questions from Board members; and (3) the Adviser had kept the Board apprised of developments relating to the Fund. The Board members also

ADDITIONAL INFORMATION (Unaudited) (Continued)

considered continued efforts undertaken by the Adviser to maintain an effective compliance program. The Board members concluded that the nature and extent of the services provided were reasonable and appropriate in relation to the Fund's investment goals and strategies, the corporate and regulatory environment in which the Fund operates, the level of services provided by the Adviser, and that the quality of the Adviser's service continues to be high.

Investment Performance

The Board members took note of the Adviser's continued adherence to its investment discipline. The Board members were provided with information regarding the Fund's total return on net asset value performance in comparison to its peer funds for the 1- and 3-year periods. This information showed that the Fund's performance was above the peer group average for the 1- and 3-year periods. The Board members reviewed the Fund's performance compared to relevant indices and funds thought to be generally comparable to the Fund and examined differences between the Fund and certain funds in the comparison group. The Board members also reviewed in detail relative fees and expenses of the Fund and the funds in the comparison group, including comparative advisory fee, administration fee and total expense ratios, and noted that the Fund had below average advisory fees, below average advisory/administration fees and, a below average total expense ratio.

Profitability

The Board members considered the Adviser's methodology for determining its profitability with respect to the Fund, and the Adviser's profit margin on an after-tax basis attributable to managing the Fund based on two expense allocation methods. The Board members also considered that the Adviser provided, for a lower fee, services to separate account clients and determined that the difference was justified in light of the additional services and costs associated with managing registered investment companies, such as the Fund. The Board members accepted the Adviser's statement that it did not realize material indirect benefits from its relationship with the Fund and did not obtain soft dollar credits from securities trading.

Economies of Scale

The Board members considered whether economies of scale could be realized because the Adviser advises other similar funds. The Board members acknowledged that, because the Adviser's portfolio management is focused exclusively on preferred securities, certain economies of scale could be realized across all of the Adviser's clients in terms of research and portfolio management and that these economies are shared by all of the Adviser's clients both through the overall level of fees and through reinvestment in the Adviser's business with technology, added personnel and infrastructure. The Board members also noted that the Fund's advisory fee schedule declines as assets increase beyond a certain level (commonly known as a "breakpoint"), and that breakpoints provide for a sharing with shareholders of benefits derived as a result of potential economies of scale.

ADDITIONAL INFORMATION (Unaudited) (Continued)

In light of their discussions and considerations as described above, the Board members made the following determinations:

- the nature and extent of the services provided by the Adviser are reasonable and appropriate, and the quality of the services is high;
- the Fund's performance for the 1- and 3-year periods was satisfactory, given the Fund's investment policies and strategies and the Adviser's adherence to them;
- the fee paid to the Adviser was reasonable in light of (i) comparative performance and expense and advisory fee information, (ii) the cost of the services provided and profits realized, and (iii) the benefits derived or to be derived by the Adviser from the relationship with the Fund; and
- there were not at this time significant economies of scale to be realized by the Adviser in managing the Fund's assets, and the fee was structured to provide for a sharing of the benefits of economies of scale.

Based on these conclusions, the Board members determined that approval of the continuation of the Agreement was in the best interests of the Fund and its shareholders.
