

FLAHERTY & CRUMRINE DYNAMIC PREFERRED AND INCOME FUND

To the Shareholders of Flaherty & Crumrine Dynamic Preferred and Income Fund (“DFP”):

Increased volatility was a common theme in most markets during the first fiscal quarter¹, and the preferred securities market was no exception. Total return² on net asset value (“NAV”) was -3.3% for the quarter, while total return on market price was 0.6%.

As we mentioned in our last letter, markets entered a new phase with “liftoff” in December. The Federal Reserve’s 0.25% hike in short-term interest rates was its first step in slowly removing unprecedented levels of monetary accommodation. However, other parts of the world, notably Europe and Japan, are still easing monetary policy by increasing quantitative easing (QE) programs and pushing short-term interest rates into negative territory. With concerns over economic growth in China adding to the equation, investors are struggling to figure out how all the pieces fit together going forward. Understandably, markets are factoring in a possibility of policy mistakes along the way, as these are uncharted territories for everyone. The result has been increased volatility in most markets, including commodities (oil, natural gas, and metals), stocks, U.S. Treasuries, corporate bonds, and preferred securities.

Reduced probabilities for future rate increases in the U.S., and negative rates in some regions, triggered an absolute rout in bank common stocks—with the average U.S. bank stock returning -20% during the fiscal period. Preferred securities fared much better but cheapened in sympathy (as did more-senior bank securities). Bank earnings should benefit from higher interest rates, but any upside to future earnings that investors had been hoping for (and pricing into stock prices) has been scaled back from earlier projections.

European bank common stocks were among the worst performers, and this had a related impact on the contingent capital securities market (these “CoCos” are the non-U.S. version of preferreds). Deutsche Bank was in the headlines yet again—this time with concerns about its ability to pay coupons on CoCos and preferred securities. The market reacted very negatively, and CoCo prices were dragged down substantially across the board. Once again, U.S. preferreds fared better but still cheapened in sympathy.

There is a lot for investors in all markets to consider, but as it relates to preferreds, we suggest taking a step back to reflect on a longer-term view of favorable fundamentals.

Bank earnings are certainly important to investors, since dividends are paid out of earnings and profits. However, *growth* in earnings, while critical to common stock valuation, is *not* a critical determinant of creditworthiness and preferred-stock valuation. We focus much more on a bank’s capital—on its ability to absorb losses while still being able to pay preferred dividends—than on earnings growth. On this front, the news is positive as the common equity capital at banks in which we invest continues to build, which supports debt and preferred stock that are senior to common equity.

¹ December 1, 2015—February 29, 2016

² Following the methodology required by the Securities and Exchange Commission, total return assumes dividend reinvestment.

Low interest rates will have mixed implications for both issuers of and investors in preferred securities, but overall they should benefit prices of preferred securities as a global search for yield continues. We also believe recent concerns around CoCos (which represented 1.7% of the Fund as of period end) will turn out to be noise, as issuers and regulators consider CoCos a necessary market that they are loath to damage by not paying coupons.

Global economic recovery will be slow, and policy mistakes are likely to be made. As we have said before, income (coupons) can make up for quite a bit of principal change over time—and preferreds continue to offer higher yields than many other fixed-income securities. While volatility may be with us for some time, and the ride may be bumpy, we believe total returns will be competitive over time for preferred investors.

As always, we encourage you to visit the Fund's website, www.preferredincome.com for timely and important information.

Sincerely,

The Flaherty & Crumrine Portfolio Management Team

March 31, 2016

February 29, 2016	0.1600	23.14	22.64	22.68

⁽¹⁾ Whenever the net asset value per share of the Fund's Common Stock is less than or equal to the market price per share on the reinvestment date, new shares issued will be valued at the higher of net asset value or 95% of the then current market price. Otherwise, the reinvestment shares of Common Stock will be purchased in the open market.

1. Aggregate Information for Federal Income Tax Purposes

At February 29, 2016, the aggregate cost of securities for federal income tax purposes was \$691,398,086, the aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost was \$20,510,936 and the aggregate gross unrealized depreciation for all securities in which there was an excess of tax cost over value was \$34,493,080.

2. Additional Accounting Standards

Fair Value Measurements: The Fund has analyzed all existing investments to determine the significance and character of all inputs to their fair value determination. The levels of fair value inputs used to measure the Fund's investments are characterized into a fair value hierarchy. Where inputs for an asset or liability fall into more than one level in the fair value hierarchy, the investment is classified in its entirety based on the lowest level input that is significant to that investment's valuation. The three levels of the fair value hierarchy are described below:

- Level 1 – quoted prices in active markets for identical securities
- Level 2 – other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 – significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. Transfers in and out of levels are recognized at market value at the end of the period.

NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

A summary of the inputs used to value the Fund's investments as of February 29, 2016 is as follows:

	Total Value at February 29, 2016	Level 1 Quoted Price	Level 2 Significant Observable Inputs	Level 3 Significant Unobservable Inputs
Preferred Securities				
Banking	\$356,778,825	\$301,432,547	\$ 55,346,278	\$—
Financial Services	5,733,305	5,733,305	—	—
Insurance	190,394,687	113,838,117	76,556,570	—
Utilities	17,765,891	9,485,287	8,280,604	—
Energy	38,677,104	23,116,532	15,560,572	—
Real Estate Investment Trust (REIT)	30,410,995	30,410,995	—	—
Miscellaneous Industries	15,655,148	4,490,648	11,164,500	—
Corporate Debt Securities				
Banking	13,014,760	13,014,760	—	—
Communication	2,717,310	2,717,310	—	—
Miscellaneous Industries	621,250	621,250	—	—
Common Stock				
Energy	1,141,117	1,141,117	—	—
Money Market Fund	4,505,550	4,505,550	—	—
Total Investments	<u>\$677,415,942</u>	<u>\$510,507,418</u>	<u>\$166,908,524</u>	<u>\$—</u>

During the reporting period, there were no transfers into Level 1 from Level 2 or into Level 2 from Level 1.

The fair values of the Fund's investments are generally based on market information and quotes received from brokers or independent pricing services that are approved by the Board of Directors and are unaffiliated with the Adviser. To assess the continuing appropriateness of security valuations, management, in consultation with the Adviser, regularly compares current prices to prior prices, prices across comparable securities, actual sale prices for securities in the Fund's portfolio, and market information obtained by the Adviser as a function of being an active market participant.

Securities with quotes that are based on actual trades or actionable bids and offers with a sufficient level of activity on or near the measurement date are classified as Level 1. Securities that are priced using quotes derived from implied values, indicative bids and offers, or a limited number of actual trades—or the same information for securities that are similar in many respects to those being valued—are classified as Level 2. If market information is not available for securities being valued, or materially-comparable securities, then those securities are classified as Level 3. In considering market information, management evaluates changes in liquidity, willingness of a broker to execute at the quoted price, the depth and consistency of prices from pricing services, and the existence of observable trades in the market.
