

FLAHERTY & CRUMRINE TOTAL RETURN FUND

To the Shareholders of Flaherty & Crumrine Total Return Fund (“FLC”):

Fiscal 2017 has been a very good year for preferred securities, and the third fiscal quarter¹ continued in stride. Total return² on net asset value (“NAV”) was 3.1% for the quarter, bringing total return for the first nine months of fiscal 2017 to 16.3%. Total return on market price over the same periods was -0.1% and 14.1%, respectively.

Credit conditions continue to provide a supportive backdrop for yields and spreads, as most issuers of preferreds maintain strong balance sheets. Bank payout ratios (common stock dividends plus share buybacks) are now averaging at or above 100% of current earnings, which means, as a group, banks are no longer adding to their common equity layer of capital. Normally, this could be cause for concern – but given years of balance-sheet strengthening since the financial crisis, these payout ratios are comfortably supported.

Political headlines of all flavors remain omnipresent, including topics such as healthcare reform, tax reform, immigration, and North Korea. Equity and fixed-income markets, however, have largely ignored a lack of near-term progress on these issues and focused on potential for positive economic developments – notably lower taxes and regulatory reform. There are winners and losers in all policy decisions, but markets are pricing in some upside from lower tax rates and reduced regulatory burdens.

Away from these headlines, we have been living in a low-volatility financial environment for quite some time, which has been positive for spreads of most fixed-income products. Mid- to longer-term interest rates generally fell during the quarter, although rates have remained relatively range-bound in recent years. For example, the constant-maturity 10-year Treasury yield, currently around 2.3%, has been within about 0.75% of today’s rate since mid-2011. The economy continues to expand moderately with few signs of higher inflation. As a result, the Federal Reserve is moving very deliberately in removing accommodative monetary policy. The Fed last hiked the federal funds rate in June and has another 0.25% hike penciled in for December. In October, it will begin scaling back reinvestment of Treasury and mortgage-backed securities acquired in the wake of the financial crisis. Although we expect markets will take unwinding of “quantitative easing” in stride, the Fed will be the first major central bank to shrink its balance sheet, and this is a new source of market uncertainty.

Financial regulators in the United Kingdom announced that London banks will no longer be required to submit quotes for LIBOR (London interbank offered rate) after December 31, 2021. Since LIBOR is a reference rate for trillions of dollars of financial instruments – including many floating and fixed-to-floating rate preferred securities – it will be critical to find an alternative benchmark reference rate for instruments continuing past 2021. The Federal Reserve assigned the Alternative Reference Rate Committee (ARRC) to work on a transition from U.S. Dollar LIBOR to a new benchmark reference rate, and they have already identified viable alternatives. Once an alternative is finalized, transition to a new benchmark reference rate will be complicated by the sheer number of instruments involved and mechanics of a change. This process will take time, but we believe market participants have a large incentive to get it right.

¹ June 1, 2017—August 31, 2017

² Following the methodology required by the Securities and Exchange Commission, total return assumes dividend reinvestment.

One of the best places to find total return this quarter was in the primary market. New issue supply has been limited all year, and redemptions of higher-coupon preferred securities have continued at a healthy pace. Many offerings were met with strong demand that exceeded deal size, which in turn pushed prices up. This robust primary market also boosted secondary markets, as prices adjusted to reflect new-issue clearing levels.

During the quarter, a modest drop in interest rates helped lower-coupon securities outperform higher-coupon securities at the margin. Like last quarter, it is difficult to identify laggards in the portfolio this year. Performance lag has been relative return – not absolute negative return – in most cases – typically a result of call (redemption) features embedded in most preferreds. As a security moves above its call price, the call option limits further upside potential as rates or spread move lower. Investors continue to earn coupons, many of which are tax-advantaged, but price increases become more limited.

Looking forward, returns should come mostly from the coupons on securities as the pace of price gains tapers off or even reverses. Compared to fixed-income alternatives, however, preferred securities continue to offer value. Market volatility could increase, and economic or credit conditions could change – which may cause spreads to widen – but we believe preferreds' combination of credit quality and yield will be difficult to replace in other fixed-income asset classes.

As always, we encourage you to visit the Fund's website, www.preferredincome.com, for important information.

Sincerely,

The Flaherty & Crumrine Portfolio Management Team

September 30, 2017

⁽¹⁾ Whenever the net asset value per share of the Fund's Common Stock is less than or equal to the market price per share on the reinvestment date, new shares issued will be valued at the higher of net asset value or 95% of the then current market price. Otherwise, the reinvestment shares of Common Stock will be purchased in the open market.

NOTES TO FINANCIAL STATEMENTS (Unaudited)

1. Aggregate Information for Federal Income Tax Purposes

At August 31, 2017, the aggregate cost of securities for federal income tax purposes was \$311,498,369, the aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost was \$30,663,121 and the aggregate gross unrealized depreciation for all securities in which there was an excess of tax cost over value was \$23,522,913.

2. Additional Accounting Standards

Fair Value Measurements: The Fund has analyzed all existing investments to determine the significance and character of all inputs to their fair value determination. The levels of fair value inputs used to measure the Fund's investments are characterized into a fair value hierarchy. Where inputs for an asset or liability fall into more than one level in the fair value hierarchy, the investment is classified in its entirety based on the lowest level input that is significant to that investment's valuation. The three levels of the fair value hierarchy are described below:

- Level 1 – quoted prices in active markets for identical securities
- Level 2 – other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 – significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. Transfers in and out of levels are recognized at market value at the end of the period.

NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

A summary of the inputs used to value the Fund's investments as of August 31, 2017 is as follows:

	Total Value at August 31, 2017	Level 1 Quoted Price	Level 2 Significant Observable Inputs	Level 3 Significant Unobservable Inputs
Preferred Securities				
Banking	\$162,753,584	\$140,830,893	\$ 21,907,691	\$ 15,000
Insurance	71,057,920	38,969,993	32,087,927	—

Insurance	4,299,177	—	4,299,177	—
Energy	1,238,805	—	1,238,805	—
Communication	1,837,135	1,837,135	—	—
Miscellaneous Industries	2,884,110	324,510	2,559,600	—
Common Stock				
Banking	605,475	605,475	—	—
Money Market Fund	153,273	153,273	—	—
Total Investments	<u>\$318,638,577</u>	<u>\$217,709,760</u>	<u>\$100,815,989</u>	<u>\$112,828</u>

During the reporting period, securities with an aggregate market value of \$2,856,127 were transferred into Level 1 from Level 2. The securities were transferred due to an increase in the quantity and quality of information related to trading activity or broker quotes for these securities. During the period, there were no transfers into Level 2 from Level 1. During the reporting period, there were no transfers into or out of Level 3.

The fair values of the Fund's investments are generally based on market information and quotes received from brokers or independent pricing services that are approved by the Board of Directors and are unaffiliated with the Adviser. To assess the continuing appropriateness of security valuations, management, in consultation with the Adviser, regularly compares current prices to prior prices, prices across comparable securities, actual sale prices for securities in the Fund's portfolio, and market information obtained by the Adviser as a function of being an active market participant.

Securities with quotes that are based on actual trades or actionable bids and offers with a sufficient level of activity on or near the measurement date are classified as Level 1. Securities that are priced using quotes derived from implied values, indicative bids and offers, or a limited number of actual trades—or the same information for securities that are similar in many respects to those being valued—are classified as Level 2. If market information is not available for securities being valued, or materially-comparable securities, then those securities are classified as Level 3. In considering market information, management evaluates changes in liquidity, willingness of a broker to execute at the quoted price, the depth and consistency of prices from pricing services, and the existence of observable trades in the market.

NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

The following is a reconciliation of Level 3 investments for which significant unobservable inputs were used to determine fair value:

	Total Investments	Preferred Securities Banking	Corporate Debt Securities Financial Services
Balance as of 11/30/16	\$112,356	\$15,000	\$97,356
Accrued discounts/premiums	—	—	—
Realized gain/(loss)	—	—	—
Change in unrealized appreciation/(depreciation)	472	—	472
Purchases	—	—	—
Sales	—	—	—
Transfers in	—	—	—
Transfers out	—	—	—
Balance as of 08/31/17	\$112,828	\$15,000	\$97,828

For the nine months ended August 31, 2017, total change in unrealized gain/(loss) on Level 3 securities still held at period-end and included in the change in net assets was \$472.

The following table summarizes the valuation techniques used and unobservable inputs developed to determine the fair value of Level 3 investments:

Category	Fair Value at 08/31/17	Valuation Technique	Unobservable Input	Input Range (Wgt Avg)
Preferred Securities (Banking)	\$15,000	Bankruptcy recovery	Credit/Structure-specific recovery	0.00%-0.50% (0.15%)
Corporate Debt Securities (Financial Services)	97,828	Bankruptcy recovery and market information	Credit/Structure-specific recovery	1%-4% (2.1%)

The significant unobservable inputs used in the fair value measurement technique for bankruptcy recovery are based on recovery analysis that is specific to the security being valued, including the level of subordination and structural features of the security, and the current status of any bankruptcy or liquidation proceedings. Observable market trades in bankruptcy claims are utilized by management, when available, to assess the appropriateness of valuations, although the frequency of trading depends on the specific credit and seniority of the claim. Expected recoveries in bankruptcy by security type and industry do not tend to deviate much from historical recovery rates, which are very low (sometimes zero) for preferred securities and more moderate for senior debt. Significant changes in these inputs would result in a significantly higher or lower fair value measurement.

NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

3. Subsequent Event

Management has evaluated the impact of all subsequent events in the Fund through the date this quarterly report was issued, and has determined that there was the following subsequent event:

The Fund recently amended its committed financing agreement with BNP Paribas Prime Brokerage International, Ltd. ("Financing Agreement"). Effective September 1, 2017, the lender charges an annualized rate of one-month LIBOR (reset monthly) plus 0.80% on the drawn (borrowed) balance. Prior to that date, the lender charged an annualized rate of three-month LIBOR (reset quarterly) plus 0.90% on the drawn balance. The lender's charges on the undrawn (committed) balance remain unchanged at an annualized rate of 0.65%. As of September 1, 2017, the committed amount and amount borrowed was \$104,800,000. The Financing Agreement may be amended from time to time to allow for changes in the committed amount.
